Leverage the full power of SAP Ariba with your Oracle ERP system with **A2O Connect**

Many companies, either by design or through unavoidable circumstances as their business grows, often end up operating with disparate best of breed systems even across a single business process such as source to pay (S2P). Integrating all of the data can be difficult and expensive due to the extensive mapping process, and real-time vision of business activity is compromised so uncovering business insights becomes slow and time consuming.

A2O Connect brings together SAP Ariba and Oracle ERP in a way that the user experiences seamless integration to provide them with a single version of the truth with transaction and master data. This positive impact on UX leads to improvement in productivity, efficiency, control and compliance.

Synchronise individual modules or the entire S2P process

Sourcing	Contracts	Supplier Management	P2P
Provides integration of Oracle RFQ's and Ariba Sourcing Requests finishing with creating a Purchase Order in Oracle on completion of the Sourcing process in Ariba	Provides integration of Ariba Contracts and Oracle Blanket Purchase Agreements. This extends the integrated process towards creating Purchase Order Releases in Oracle	Provides integration of new Supplier records as well as changed Supplier data, whether the change is made in SLP or Oracle	Provides integration of PO's, Receiving, Invoices and Payment Confirmation, supported by Master Data integration including Accounting and Supplier data

Five reasons to use A2O Connect

Out of the box pre-built connectors
All the complex mapping has already been undertaken, saving valuable resource, time and cost

Seamless end-to-end S2P process
Automates the entire S2P business process, eliminating the requirement to switch between different systems

Improvement in data accuracy
Removes the need for re-keying data, reducing manual errors and providing a single version of the truth

Enhanced reporting across the business
Increases the speed of data available to the business community, based on enhanced supplier master data

Flexibility to manage complex structures
Supports any chart of accounts configured on Oracle in addition to multiple legal entities and organisations

Seamlessly synchronize and automate your end-to-end source to pay process across SAP Ariba and Oracle ERP with **A2O Connect**

A2O Connect delivers seamless integrations between SAP Ariba and Oracle ERP, with user experience at the very heart.

Supporting both purchasing and Accounts Payable operations, it enables you to seamlessly integrate (both batch and real-time) data across Purchasing, Receiving, Invoice and Payment business processes.

Built on robust, reliable and scalable middleware – SAP Cloud Platform Integration, ITK, Oracle Weblogic, ensures that the solution will continue to support you as you continue to grow. Alternatively, customised solutions can be built using customer's own middleware.

How it works

SAP Ariba
- SLP
- P2P
- Sourcing
- Contracts

SAP CPI
